

With The amount of pupils asking for a reminder of the routines we use, I decided to make a list here for you to check or print out. We use routines to keep things in order, so for example, we don't turn around a corner and then look in the mirrors.

Before we can start to drive we need to adjust the interior of the car so we can reach all the controls and see clearly to the rear of the car. The routine we are going to use here is DSSSM or;

- Door
- Seat
- Steering wheel
- Seatbelt
- Mirrors

The next routine we use is to move away from the kerb which we call POM or:

- Prepare
- Observe
- Move

We then need to know how to stop against the kerb, the routine we now use is MSM or:

- Mirror
- Signal
- Manoeuvre

To turn left or right, we then expand the MSM routine to MSPSL or:

- Mirror
- Signal
- Position
- Speed
- Look

To approach a T Junction we add the routine LADA to the end of our MSPSL routine or:

- Look
- Assess
- Decide
- Act
